The Neuroscience Unit  
A.K.A.  
The Badr-Blockers

Greetings from the Neuroscience Unit's "One Great Unit". We are excited and have a lot going on as we embark on this new frontier.

All of our teams have been established and we have leaders in place. I hope we can meet this challenge and win this race.

The Rewards and Recognition Team has gotten a great start. Their contest to name our "One Great Unit" was really smart.

The Badr-blockers was the name selected above all the rest. Beverly Tabb, RN was the winner of this first of many contests.

The Consistency Team with all their new forms. Make being organized, efficient and prepared almost the norm.

And we all know the "Know the numbers" Team is prepared to help. They make sure we know our absences and tardies for whenever we've overslept. They inform us to guide our footsteps.

So you are welcome to come by to checkout our unit anytime. We hope you will enjoy the visit and this rhyme. See you next month.

Brenda Watt, RN co-chair Rewards and Recognition Team.
